

New Office Landscape Wien Energie

Project Competition 2018
1st Prize, Realization: 2019

“The DNA in the design”

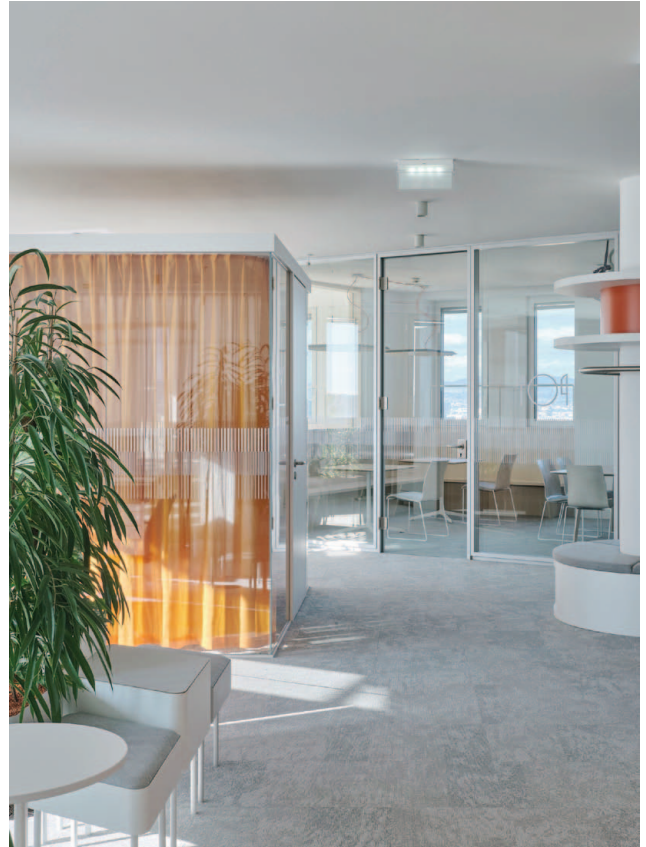

Schenker

“Finally a view from the skyscraper over the city!
The spaces have been opened and reorganized: A
bright and communicative office landscape with
alternating private spheres and meeting rooms for
concentrated work.”

Weber

Salvi

Weber

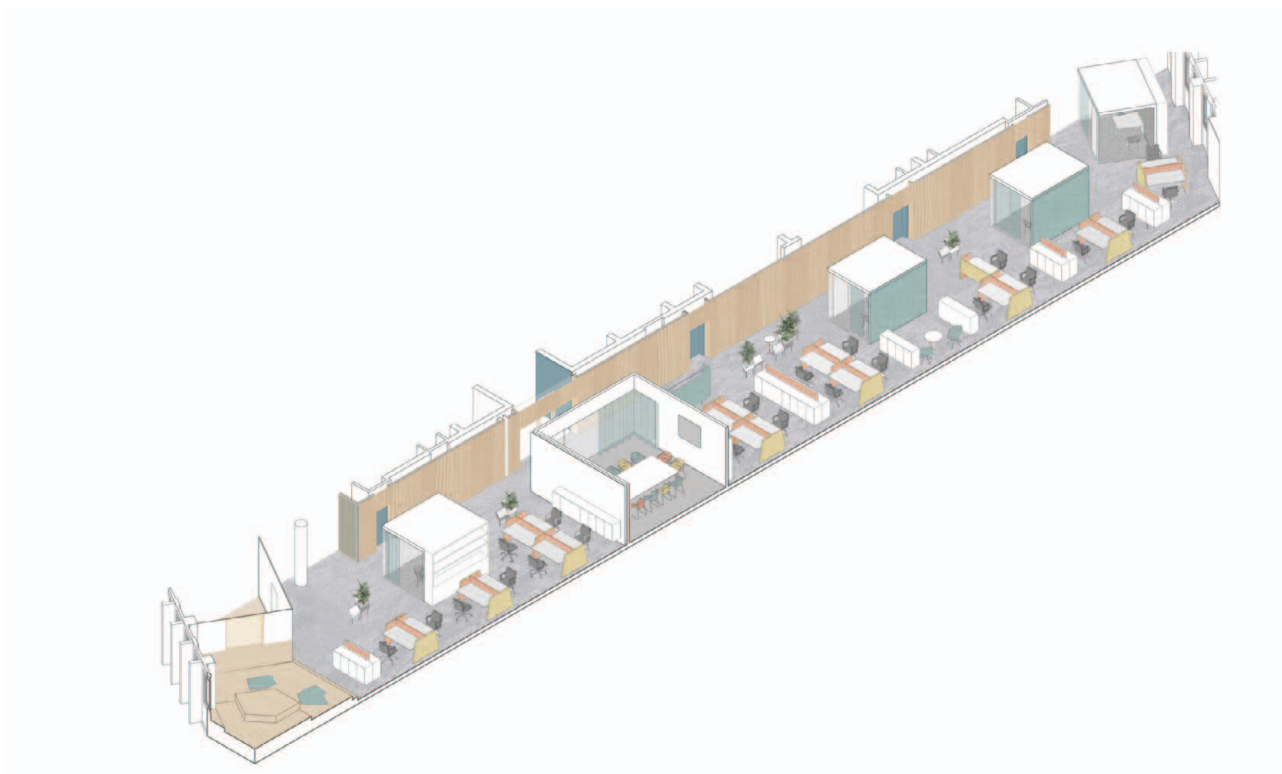

“Libraries and meeting rooms are inserted into the acute corners of the building geometry. The new timber podium brings the staff even closer to the surrounding city.”

Weber

“Wood, carpet, textiles – ideal acoustics and a warm color scheme. A flexible modular system comprised of working clusters, creative cubicles, and wardrobes.”

Schenker

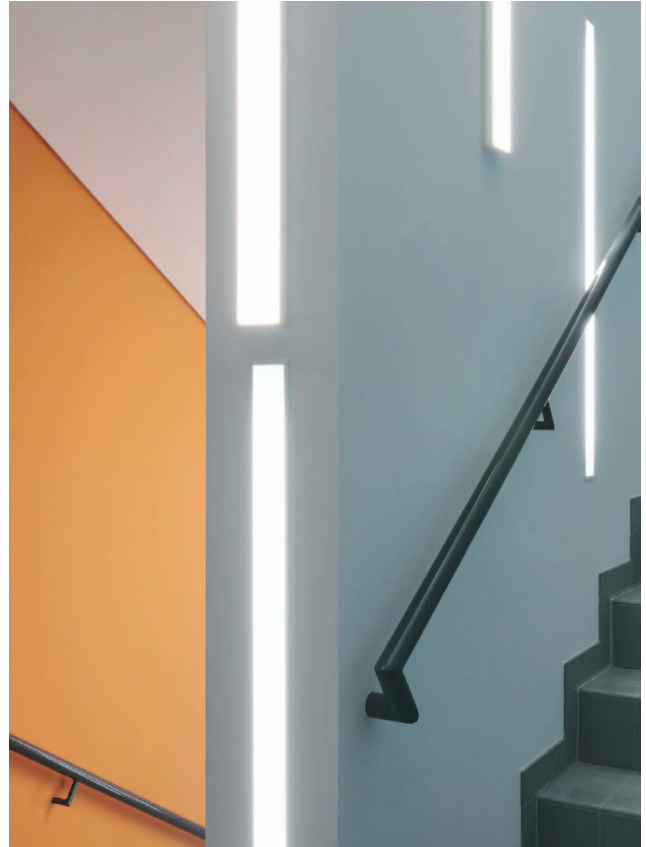

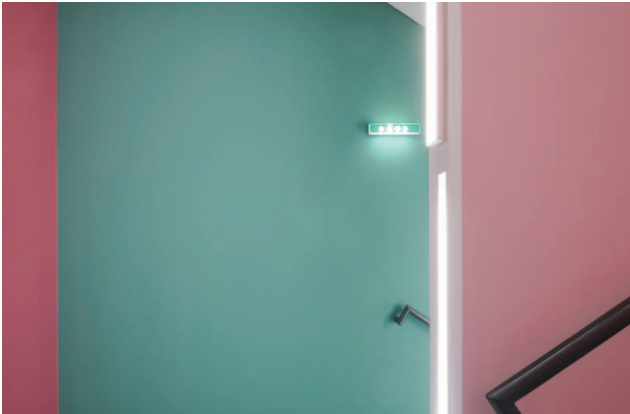

“The load bearing core is clad with wooden fins, growing like a vital tree trunk through all floors of the building, as a reflection of the corporate identity of Wien Energie.”

Salvi

Weber

“The activated corners create optimal conditions for concentrated discussions, and the warm ash wood lends the space the character of a salon.”

Schenker

“The tea kitchens and break rooms harmoniously structure the spatial continuum while their colorful accents provide clear orientation.”
