

# Vienna Landstraße Fire Station

Project Competition 2018

Recognition

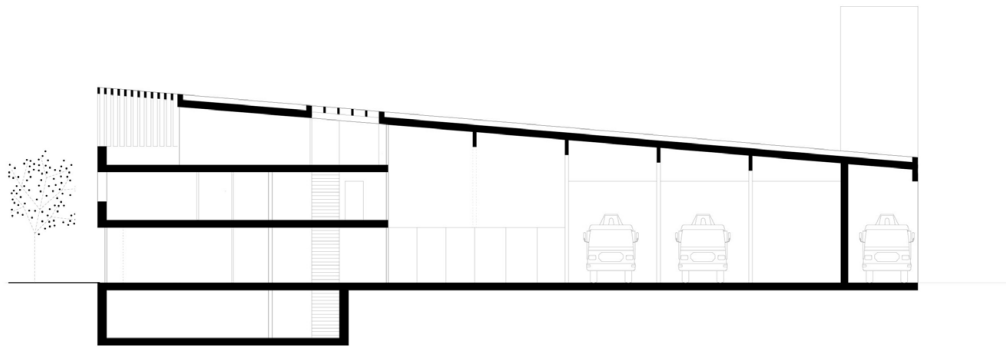

“Urban Signal”

Schenker

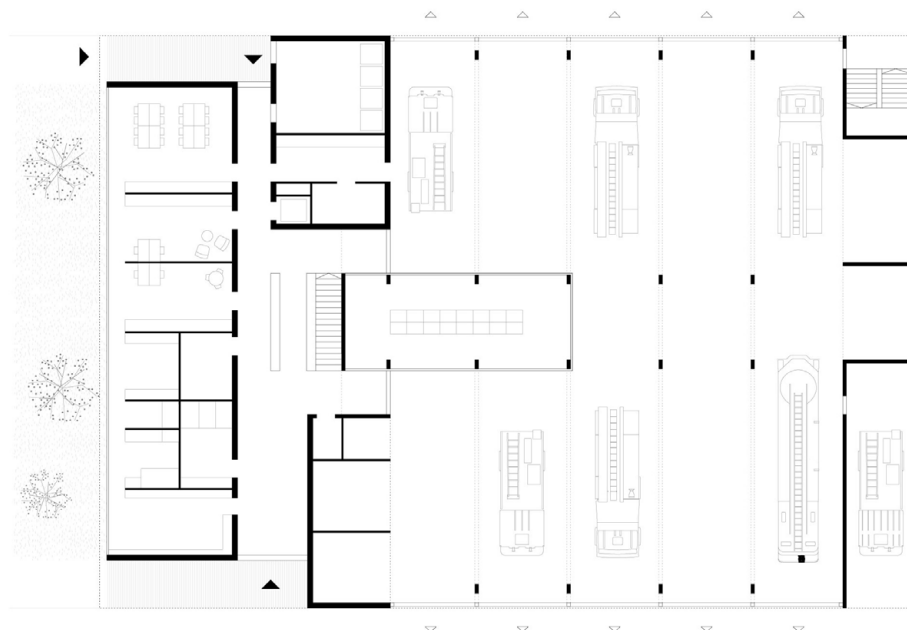

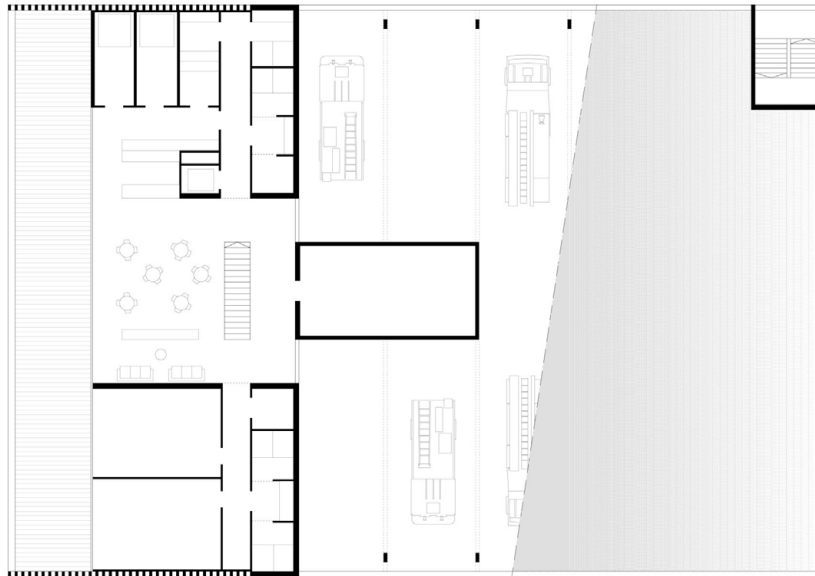

“Hard shell – soft core: The self-confident building marks an extinct volume showing precise openings within its heterogeneous industrial surrounding nearby the highway.”

Weber

“Everything gathered under a single roof. A plain and simple organisation saves lives! The ground floor contains the offices. Also from the relaxation areas on the first floor and the common areas on the second floor the big hall with the fire trucks can be easily reached in a few seconds.”

## P R O J E C T   D E T A I L S

- Commission Type:  
Open, one-stage competition  
for realization
- Award:  
Recognition
- Client:  
City of Vienna
- Location:  
Vienna, AT
- Competition:  
2018
