

FvS School Center Rösrath

Project Competition 2015
1st Prize, Realization 2017 – 2019

“Functional Reinterpretation”

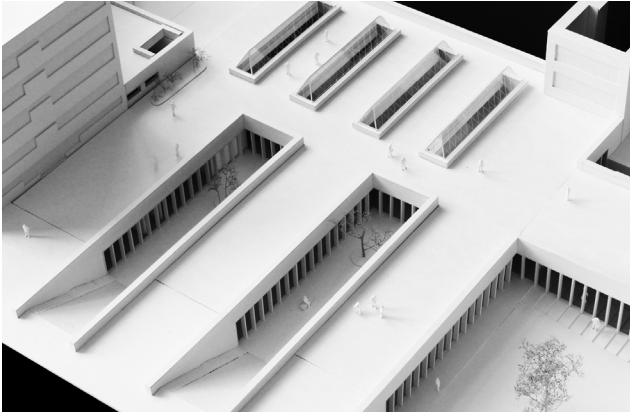

Schenker

“The guiding principle for the new building: Use the strengths of the existing architecture to achieve a coherent overall dramaturgy: functionally, aesthetically, and spatially exciting.”

Weber

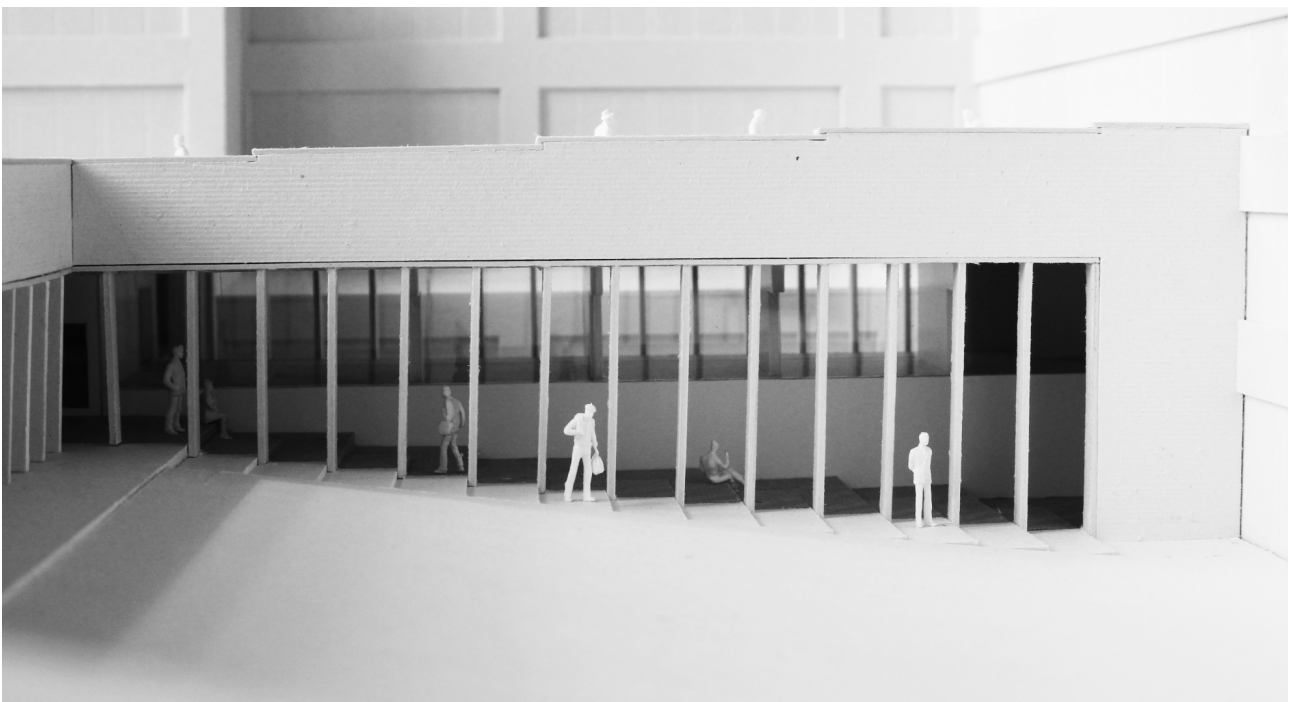

Salvi

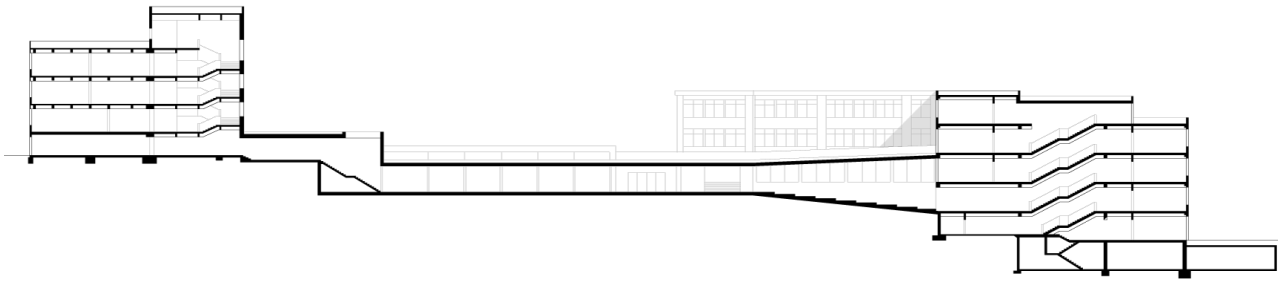

Weber

“Interlock & unite: A new, centrally located entrance in combination with the main circulation axis, which connects all building components, form the heart of the school center.”

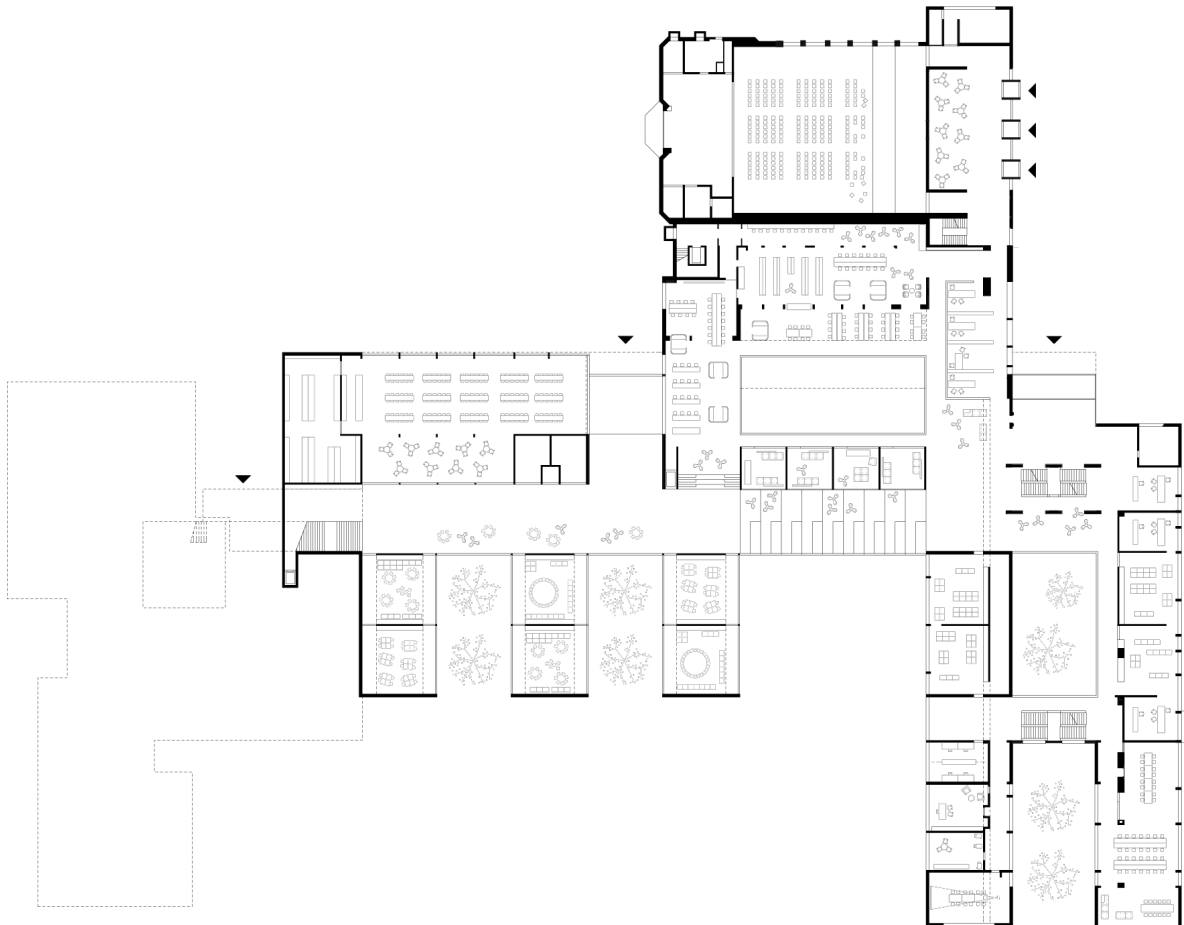

Schenker

The core of the new ensemble is the central axis with its subtle connections to the outdoors. It links the Realschule with the Gymnasium and provides access to shared functions like the cafeteria, library, and self-study center.

It also leads to flexibly adaptable classrooms. Bright, spacious, and marked by the broad stairs, this passage-way is designed not just as a circulation route but also as a lounge and a place of encounters.

P R O J E C T D E T A I L S

- Commission Type:
Invited competition for general planner, general planning
- Award:
1st Prize
- Client:
Stadt Rösrath, DE
- Location:
Rösrath, DE
- Competition:
2015
- Realization:
2017-2019
- Status:
Planning Phase
- GFA:
25.000 m²
- Building Costs:
19 M EUR
- Energy Efficiency:
EnEV 2016
- Team:
Eva Andrasova, Jana Sack, Michael Salvi, Andres Schenker, Rostislav Stoklasek, Katalin Tóth, Zsófia Varga, Thomas Weber
